Origin Skin Remedy

IOs Vs Android

iOS
The status bar is located at the very top and has information containing the carrier, Wi-Fi, and battery life.

Android: similar status bar as ios, time on the left, on the right the carrier, wifi and battery life.

Android buttons have shadows whereas ios are generally flat.

Screen sizes the iphone is a bit longer and wider than the Android size.

IOs Vs Android

buttons
-**ios**: flat and there's the option to sign in with your apple account when creating an account / or signing in.
-**Android**: shadows to elevate the buttons and create depth.

Keyboards
-**ios**: keyboard is placed with the microphone to record at the bottom.
- **Android**: includes more features at the top of the keyboard containing gifs, settings and stickers and microphone option. At the bottom screen screen there's a return button.

IOs Vs Android

- **Android** progression bar

- **iOS** measures in pt
- **android** Material measures in dp.

- **Android** elevation with the UI elements

IOs Vs Android
